

# Contours profiled wall base system

THREE NEW! PROFILES

## contours: three new profiles

Now with three new profiles, including winners from our My Contours DESIGN Competition, Contours Profiled Wall Base System® offers the look of wood base with the enhanced properties of resilient base. Contours resists chipping, absorbing moisture and splintering while eliminating the costly tasks of nailing, filling and finishing traditional wood trim.

## contours profiled wall base system

- Durable TPR rubber compound contains bio-based phthalate free plasticizer, from a rapidly renewable resource.
- Made in the U.S.A. and meets FloorScore®, NSF332 Platinum and CHPS criteria.
- Produced in 40" cartons. Available in 17 profiles with heights ranging from 3" to 7-3/4", a quarter round and corner options.
- Satin finish provides the look of custom-crafted woodwork, eliminating the nailing, sanding and priming associated with wood.
- Natural flexibility conceals irregularities in floors, walls and corners (e.g., seam of floor and wall, bowing walls, etc.), and allows for installing around architectural curves.
- All colors available at a Single Price Point. Other colors and custom colors available, minimums apply.

## corner blocks and micro corners

The dreaded corner – it's often viewed as the most difficult, costly and time-intensive element of any wall base installation. To resolve this issue, we've developed rubber corner blocks. These 100% PVC free, vulcanized and extruded corner blocks alleviate costly hand-scribing, wasted time and extra skilled craftsmen from the corner-forming process. These rubber corners also add durability because they are less likely to get damaged or detached during everyday use and maintenance of the interior space.

## corner blocks

- PVC free and phthalate free.
- Made in the U.S.A. and meets FloorScore®, NSF 332 Gold and CHPS criteria.
- Available in 2 profiles – Original (3/8") and Micro (1/4") corners. Recommended height is 1/4" taller than your intended base profile.
- Alleviate costly hand-scribing, wasted time and extra skilled craftsmen from the corner-forming process.
- Underlap wings attach to the wall adding durability to the installation so they are less likely to get damaged or detached during everyday use and maintenance of the interior space.
- All colors are inherent throughout and available at a Single Price Point.

## satin finish

Contours' satin finish provides the look of custom-crafted woodwork, eliminating the nailing, sanding and priming associated with wood. Its natural flexibility conceals irregularities in floors, walls and corners (e.g., seam of floor and wall, bowing walls, etc.), and allows for installing around architectural curves.
